Hi Chuck,

We finished second in our regional competition last Saturday March 24th. Here are pictures from the day we paddled the canoe. The hull is between 1/2" and 1" thick. It is approx. 23 gallons of concrete. There are 7 prestressed tendons running the length of the canoe and tensioned up to 325lbs. The artwork is concrete stain and then sealed with a concrete sealer. I will have pictures for you of the canoe in its display after the national competition (June 13).

Also see our website <http://www.cpnconcretecanoe.com/> for more information about our team and its activities.

Thank you for all of your help. We are looking for funding for our national competition. If you would like to donate to our team an electronic donations page can be found here <http://www.cpnconcretecanoe.com/#/how-to-donate>

Hi Chuck,

An update for our canoe placement: We placed our canoe on February 10th. We used your recommended dosage of Kel-Crete and the mix pumped perfectly. We really appreciate your assistance and the future team leaders will probably ask for your assistance in the future.

I am currently trying to get reimbursed for materials I purchased for the team and I need receipts. Would you be able to find the invoice for my purchase in your records and send it to me? The purchase was around January 10th.

Thank you for your help
