Mr. Don Kueera:

Sir in reference to your printed matter, I have just completed my tests on the shotcrete of mine tailings in the lab. And it impressed the heck out of me. We must shotcrete in the mines with as little rebound as possible and my test with at 1/2 ounce has given me a reading of less than 1.07 this is just about nil rebound.

Please send me a dealers package as soon as possible with price schedule and if possible more brochures on the Kel-Flex color chart, and the admixtures liquid and Super Dry.

Don I am ever so glad you called, San Nor has found the product that will increase my markets for concrete and masonry restoration, if possible could you send me another sample of what you last sent I used the powder sample on a block veneer made with San-Nor Crete and waste pulp sludge to strengthen the batch, you would not believe how it worked, I knew you were out there, now we must put a package together for my own dealers.

Sincerely,

Wm. (Sandy) Norris
President C.F.O.
