

## **Tuff-Kote Flex 10,000—Kel-Prime Plaster System Certification Program**

Our certification program is based upon the issuing of 10 and 15-year materials and labor project warranties from the date of application of the Tuff-Kote Flex 10,000—Kel-Prime Plaster System specified for the listed project. The systems may include one or all of the **following systems: one-coat plaster, three-coat plaster, patch repair, and crack repair**. Specifications for each system can be found on our web site at “[www.Kel-Crete.com](http://www.Kel-Crete.com)”.

### Contractor/Employee Certification Provisions:

- Contractor shall provide location and plaster system sample area for desired certification system or systems.
- Contractor shall purchase and provide Tuff-Kote Flex 10,000—Kel-Prime material sample products for the desired/specified system or systems.
- Contractor shall provide all equipment, tools, etc. to perform the desired plaster system or systems.
- Contractor shall pay instructor’s certification fee of which could vary depending upon the instructor’s locale or travel availability. In addition the contractor will pay \$250.00 per certified employee. For this reason it is suggested that the contractor be certified in all plaster systems even if they are not required for the said project. Payment for certification shall be received before issuing certified certificates.

### Notes:

- The goal of certification is that the completed project looks and performs as such that one would never know there were ever any repairs made such as not reading any cracks or patch repairs.

The Tuff-Kote Flex 10,000—Kel-Prime Plaster Systems completion will provide a solid hard plaster, uniform suction, bonding, uniform color, future crack resistance, and ultra violet ray protection.

- Tuff-Kote Flex 10,000—Kel-Prime Plaster Systems shall provide resistance to water penetration, and have no efflorescence bleeding.
- The difference between a 10-year and 15-year warranty is the addition of Kel-Prime at full concentration of 8 ounces per gallon of paint for the issuance of the 15-year warranty, or the addition of Kel-Crete Premium Super Dry Admixture to the pre-blended color stucco finish product.

### Summation:

For a list of certified contractors or their employees, technical support, etc. please call our office at 800-845-1833, or email at [kelcrete@sbcglobal.net](mailto:kelcrete@sbcglobal.net). It is very important that contractors plan their certification program, etc. as far in advance of the construction start date as possible.
