Mr. Chuck Green
KEL-CRETE INDUSTRIES
P. O. Box 33233
Tulsa, Oklahoma 74153

Dear Chuck:

It has been approximately one year since our company was first introduced to your Kel-Crete Liquid Admixture by the associate superintendent of the Washington State Penitentiary (WSP). The associate superintendent informed us about the success of your admixture in the state of Oklahoma, Department of Corrections, projects where he had previously worked.

As you know, we specified Kel-Crete use in the shotcrete for a Walla Walla, Washington, prison project and are very pleased with the tested results that are enclosed with this letter. Mr. Bob Conan at Koncrete Ready Mix who supplied the shotcrete also expressed to me they too were pleased with using Kel-Crete. You are also aware of the very positive feedback that came in from Johnson Western Gunite, the prime contractor for the shotcrete application.

We will be specifying Kel-Crete in future projects. Thank you for your support.

Sincerely,

SCM CONSULTANTS, INC.
