To Kel- Crete Industries INC

Dear Chuck

For approximately 15 years now we have been using Kel -Crete Premium Liquid Admixture for all of our shotcrete projects .

Up on your request I am happy to give an endorsement letter of support. Fifteen years ago you told me about all of the benefits we would get by just putting 3 to 5 ounces of your Kel -Crete Premium Liquid Admixture in our shocrete mix , which at the time I didn't believe possible. I would have been happy to get just a few of those benefits such as easier pumping and reduced waste. Deriving just those benefits I felt it would be worth giving it a try.

Today those fifteen years later and counting we would not do shotcrete project without Kel -Crete Premium Liquid Admixture. With current conditions in the construction industry it is even more important for us to have your Kel- Crete Premium Liquid admixtrtrue available in our business. We look forward to a continued relationship with you and your company

Your Truly

Clovis Metcalf
