

Kel-Crete Premium Liquid Admixture

Question: What does Kel-Crete Premium Liquid Admixture do for the plaster, stucco, masonry, shotcrete, and concrete industries?

Answer: Because Kel-Crete Premium Liquid Admixture performs so many functions, and provides so many benefits to these industries the answer is rather lengthy. If you are a pumping contractor the benefits are immediate that is as soon as it enters the hopper. When the Kel-Crete is added to the water all of the water becomes admixture. The **gelling function** serves to lubricate the manifold, O-rings, balls, pistons, the hose lining, etc. Due to this lubrication the pump will perform with ease, and **maintenance and fuel costs are greatly reduced.**

Kel-Crete disallows separation of the mix design so as to **eliminate hose packs.** Please review the pumping data on our web site at “[www:Kel-Crete.com](http://www.Kel-Crete.com)”.

Kel-Crete’s **plasticizing function eliminates the use of hydrated lime and other admixtures.** The mix design increases workability, and provides water retention thereby allowing the applicator to design and sculpt the mortar. It is for this reason it is so frequently used in rockscape and waterscape projects.

Kel-Crete’s **water reducing function** greatly reduces or eliminates **shrinkage cracking** at the same time **increases the psi values.** Kel-Crete also provides **flexural hardness and density of the mortar** that makes the mortar virtually waterproof.

Kel-Crete’s **air entraining function** provides protection from freeze-thaw, and its additional pumping benefits eliminate the use of, or need for **silica fume.**

In addition to all of the pumping benefits, the **gelling function** increases the **bonding** in application, **greatly reduces rebound thereby reducing material waste, and saves on cleanup.**

Summation:

When the contractor obtains all of the above mentioned benefits on his project, the proven independent laboratory tested functions and benefits in the Kel-Crete Premium Liquid Admixture, he/she will realize Kel-Crete is a free-of-cost product that will increase bottom line profits.

Furthermore Kel-Crete is a **non-toxic, non-hazardous** product that has performed for 53 years without failure. There is no other admixture, or combination of admixtures that can make and provide the claims that Kel-Crete Premium Liquid Admixture can.
